

Scrambling

location

AT THE EDGE MOUNTAINEERING
"Your greatest failure is not to try"

Scrambling is the middle ground between hill walking and rock climbing. The last ice age has left the British mountains with signs of its existence in the form of ridges and broken rocky buttresses. With a head for heights and sure footing, what better way to explore these amazing features than to get hands on and let the adrenaline flow!

CLASSIC MOUNTAIN SCRAMBLES

The aim of this course is to get you out in the mountains for a big mountaineering day out! I will guide you over some of the best classic grade 1 scrambles around but will also give you the opportunity to test your skills and put into practice what you already know.

Throughout the day we will also cover some skills as a progression and to develop upon what you already know. These may include:

- Navigation
- Movement techniques over steep ground
- Guidebook interpretation
- Route choice
- Safeguarding yourself and members of the group

WHERE SHALL I MEET YOU?

COURSE TIMINGS:

We will meet at 09:00 and hope to be finished by 17:00

BRIEF ITINERARY:

09:00 Meet & Greet

Course intro & briefs

09:45 Prep for walking

10:00 Start our day in the Hill

13:00ish Stop for lunch

17:00 Course finish, debrief & Thanks

PREVIOUS EXPERIENCE

Both the **INTRO TO SCRAMBLING** and **CLASSIC MOUNTAIN SCRAMBLES** course require you to be an experienced hill walker with good knowledge of the mountain environment. Both course are intensive and require you to have a good level of fitness as we will be spending all day covering lots of technical ground. A good head for heights is recommended.

SCRAMBLING GRADES EXPLAINED

GRADE 1

Most difficulties can usually be avoided if need be and exposure is minimal. Route finding isn't usually a problem and generally straight forward. The use of a rope is not normally required and most scrambles can be attempted in all but the worst conditions.

GRADE 2

These scrambles are more serious than the above with greater exposure and more difficult situations. Loose rock and difficult route finding may require careful judgement. A rope may be required to safeguard a small rock step or technical descent.

GRADE 3

Involves difficult moves in exposed situations. A rope and climbing equipment will be required with knowledge of how to protect a route. Route finding is usually difficult. Grade 3 scrambling extends into easy rock climbing. AT THE EDGE MOUNTAINEERING will not be operating in this area!

BOOKS, MAPS AND RESOURCES

- Explorer 1:25 000 scale map of the area
- 'North Wales Scrambles' – Gary Smith (Northern Edge Books)
- 'Lake District Climbs and Scrambles' – Stephen Goodwin (Vertebrate Publishing)
- 'Classic Mountain Scrambles in England and Wales' – Graham Thompson
- 'Hill Walking' – Steve Long
